

Company's Price List for Light Water (Deuterium Depleted Water)

(June, 2026)

Deuterium Depletion (DD) Levels of Light Water (parts per million – Deuterium)	Minimum order quantity (liters)*	Total price per liter (including Door-delivery charges)**
DD Level 1 (100 ppm-D)	60 / 100	Rs. 233 + 5% GST = Rs. 245 per liter
DD Level 2 (75 ppm-D)	60 / 100	Rs. 357 + 5% GST = Rs. 375 per liter
DD Level 3 (50 ppm-D)	60 / 100	Rs. 471 + 5% GST = Rs. 495 per liter
DD Level 4 (25 ppm-D)	60 / 100	Rs. 947 + 5% GST = Rs. 995 per liter

Notes:

- Packing** – Primary packing in 20 liter new cans. Outer packing in paper corrugated boxes.
- Dispatch** – Within 7 days from the date of receiving the payment.
- *Minimum order quantities -**
 - For 25 ppm-D – 60 liters;
 - For 100 / 75 / 50 ppm-D – 100 liters.
- **Door-delivery charges** – For minimum order quantities as above, door-delivery charges by VRL Logistics inside the city / town limits are included in the above prices (https://www.vrlgroup.in/vrl_branch_list.aspx).
- Light Water has been purified at isotopic level to reduce the deuterium (which is 100 crore times smaller than a micron). It is further purified in a 10 stage process, including activated carbon filter, UF, RO, UV, Ozone treatment; and re-mineralized as per the standard guidelines. For re-purification from any contamination during transport and storage, use 'Kent Gold Optima' or equivalent water purifier (<https://www.amazon.in/Gold-Optima-10-Litres-Non-electric-Purifier/dp/B009DA69W6>). Do not drink directly. Please store in a cool and dark place, away from sunlight.
- Free accessories (with the first order only) –**
 - Electric pump for water can;
 - Lifting handle for water can;
 - Wheeled trolley;
 - A questionnaire (to be filled-up, before starting Light Water therapy).
- Goods once sold will not be taken back or exchanged.

Bank details -

Name: Light Water Healthcare Limited
Account Number: 069663300004021
Name of the bank: Yes Bank
Address: CMH Road, Bangalore 560 038
IFSC: YESB0000696

GPay - 9916009080@okbizaxis

Contact details –

Light Water Healthcare Limited (ISO 9001 Certified Company)

No. 336/3, MCS Layout, SRK Nagar Post, Bangalore – 560077, India.

Levels of Light Water Therapy

Light Water Healthcare Limited supplies Light Water (Deuterium Depleted Water), in reduced ppm-D levels -

Deuterium Depletion (DD) Levels of Light Water (Considering the intake of 1.5 to 3 liters per day, based on 30 – 40 ml per kg of body weight)	Reduced level of Deuterium in the Light Water (ppm-D)
DD Level 1 – 2 Starting therapy for all, to control / reduce 275 types of mitochondrial diseases, for prevention of cellular damage, for pro-youthing and longevity	100 ppm-D To reach 120 - 130 ppm of Deuterium levels in the body
DD Level 2 – 3 Higher therapy for all, to control / reduce 275 types of mitochondrial diseases, including hypertension, diabetes, coronary heart diseases, brain, kidney and liver problems, metabolic disorders, all kinds of cancer, allergies, obesity, partial impotency, stress, depression, epilepsy and autism	75 ppm-D To reach 105 - 120 ppm of Deuterium levels in the body
DD Level 3 – 4 Advanced therapy for all the above-mentioned chronic diseases, and for more than 100 types of cancer	50 ppm-D To reach 90 – 105 ppm of Deuterium levels in the body
DD Level 4 – 5 (and above 5) Ultimate therapy for stage 3 and 4 cancer patients, and for severely ill patients to rejuvenate their life	25 ppm-D To reach 80 – 90 ppm of Deuterium levels in the body

Note: To maximise the health benefits of Light Water, it is important to ensure the availability of all the nutrients in the body, such as vitamins, minerals and proteins as per the Recommended Dietary Allowance (RDA) suggested by the Indian Council of Medical Research (ICMR).

Recommended Deuterium Depletion (DD) Levels

Deuterium Depletion (DD) Levels are inversely proportional to the ppm-D levels of Deuterium in the human body. The minimum required DD level is 1 - 2 for mild diseases; and 4 - 5 for severe diseases as per the following formula –

$$DD \text{ Level} = \frac{(150 \text{ ppm-D}) - (\text{level of Light Water in ppm-D}) \times \text{Light Water consumption per day in litres}}{\text{Body weight}}$$

For example, if a person having 75 kgs of body weight drinks 2 litres of 100 ppm-D Light Water per day, his DD Level will be –

$$\frac{(150 - 100) \times 2}{75} = 1.33$$

In another example, if a person having 50 kgs body weight drinks 2 litres of 50 ppm-D Light Water per day, his DD Level will be –

$$\frac{(150 - 50) \times 2}{50} = 4$$

The following table gives the recommended DD Levels and the corresponding ppm-D Levels in the human body –

Age group (years)	For longevity and for mild diseases		For severe mitochondrial diseases	
	Recommended DD Levels	Corresponding ppm-D Levels in the human body	Recommended DD Levels	Corresponding ppm-D Levels in the human body
2 – 20	1 – 2	130 – 120	2 - 3	120 – 105
20 - 40	2 – 3	120 – 105	3 – 4	105 – 90
40 – 60	3 – 4	105 – 90	3 – 5	105 – 80
60 – 80	4 – 5	90 – 80	4 – 5	90 – 80
80 and above	4 – 5	90 – 80	Above 5	Below 80

Age group (years)	For all kinds of cancer			
	Stages 1 & 2		Stages 3 & 4	
	Recommended DD Levels	Corresponding ppm-D Levels in the human body	Recommended DD Levels	Corresponding ppm-D Levels in the human body
2 – 20	2 – 4	120 – 90	3 – 5	105 – 80
20 - 40	2 – 4	120 – 90	3 – 5	105 – 80
40 – 60	2 – 4	120 – 90	4 – 5	90 – 80
60 – 80	3 – 5	105 – 80	4 – 5	90 – 80
80 and above	3 – 5	105 – 80	Above 5	Below 80

Note: Above Deuterium levels in the human body have been calculated, based on daily consumption of food and drink (including water) @ 6 - 7% of body weight.
